

® IVPACKS LLC

sales@ivpacks.com

worldwide delivery and Customs support

<https://ivpacks.com>

Compounding pharmacies, outsourcing manufacturing facilities and other cGMP regulated facilities worldwide choose the vial packaging components that IVPACKS LLC provides. All paid orders receive a certificate of conformance for compliance with cGMP related audits.

WASHED & READY FOR STERILIZATION / READY TO STERILIZE

IVPACKS LLC offers pre-washed, ready to sterilize vials and vial stoppers. We provide a cost efficient solution to customers that need an alternative to manual vial and stopper preparation prior to autoclaving.

Vial Stoppers - washed, ready to sterilize in autoclave bags
13mm and 20mm sizes available

a). Pre-washed, double bagged vial stoppers in both round bottom and lyophilization style construction. All of the ready to sterilize vial stoppers that we offer will include both 3rd party endotoxin testing and CFU Bioburden testing reports performed by FDA and ISO registered facilities.

Serum vials - washed, ready to sterilize in autoclave bags.
Clear and amber are available.

b). Pre-washed, double bagged serum vials in plastic trays, ready to sterilize by the end user. Both clear and amber Type 1 serum vials are available pre-washed using USP Water for Injection (WFI). Sizes available are 2ml, 3ml, 5ml (2 sizes) and 10ml (2 sizes). Offered in convenient single trays to allow cost efficiency for both small and large batch productions.

IVPACKS LLC also offers vials and stoppers that are both pre-washed and sterilized, ready to fill in both open, unsealed vial formats, as well as pre-stoppered and sealed formats.
